

"IPF-316" 16-KEY /32-CHANNEL USER PANEL

The *IPF-316 Panel* allows easy control over up to 32 channels displayed on two pages (16 channels each). A command unit that grants easy communication to a high number of destinations, no matter if these are private calls, partyline teams, generation of CUE-Light signals, GPIO activation or others.

This user panel is the main piece of gear in the *IpCom* family and has been designed to ease communications at broadcast facilities, sport arenas, big opera houses, houses of worship and other permanent installations.

However, the *ALTAIR IPCom Series* can also be used at live music festival, for instance, making a great solution for multi-stage communication for coordination of large teams.
