

# DAVINCI RESOLVE 15

FAIRLIGHT AUDIO

## Professional tools designed for film and television audio post!

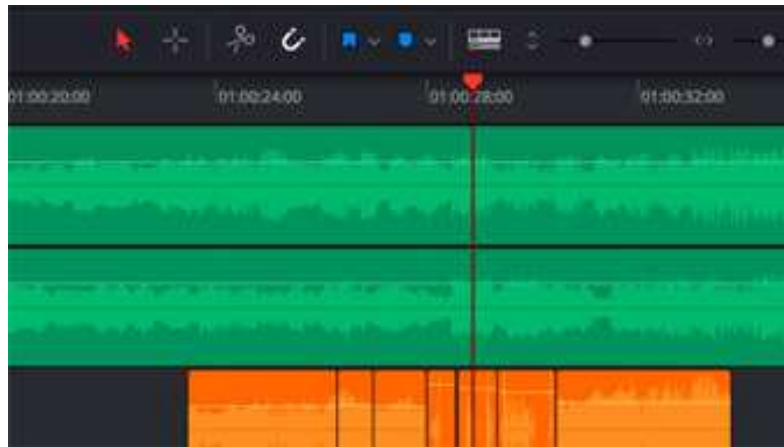

Audio is no longer an afterthought in post production! Sound elevates the emotional impact of the picture with stirring scores, clear dialog and incredible effects that make us feel like we're part of the story. Now, for the first time ever, professional audio post production is fully integrated into a single application that gives sound editors, colorists, and video editors everything they need to seamlessly collaborate and create films and television shows that will be remembered for generations to come!

# **New Fairlight Features in DaVinci Resolve 15**

## Automatic Dialog Replacement

Comprehensive professional ADR toolset for recording dialog replacement.

## Fixed Playhead

Smooth scrolling timeline with fixed playhead in the center of the screen.

## Truly Professional Tools

Everything you need to deliver incredible  
cinema sound!

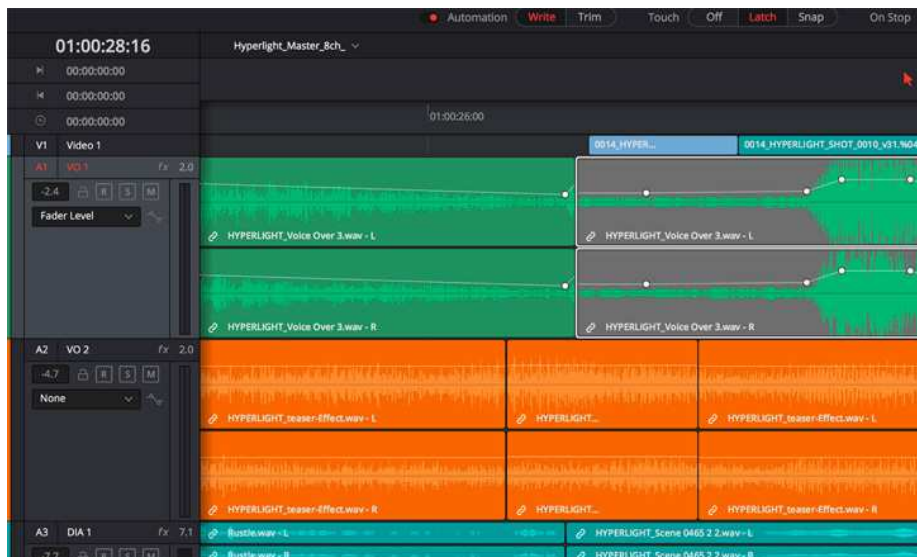

DaVinci Resolve's Fairlight audio page is a complete integrated digital audio workstation for Film and TV! You get a massive set of recording, editing, mixing, sweetening, finishing and mastering tools. With the Fairlight Audio Accelerator you get state of the art sub-millisecond super low latency. There simply is no other software with this level of dedicated audio power!

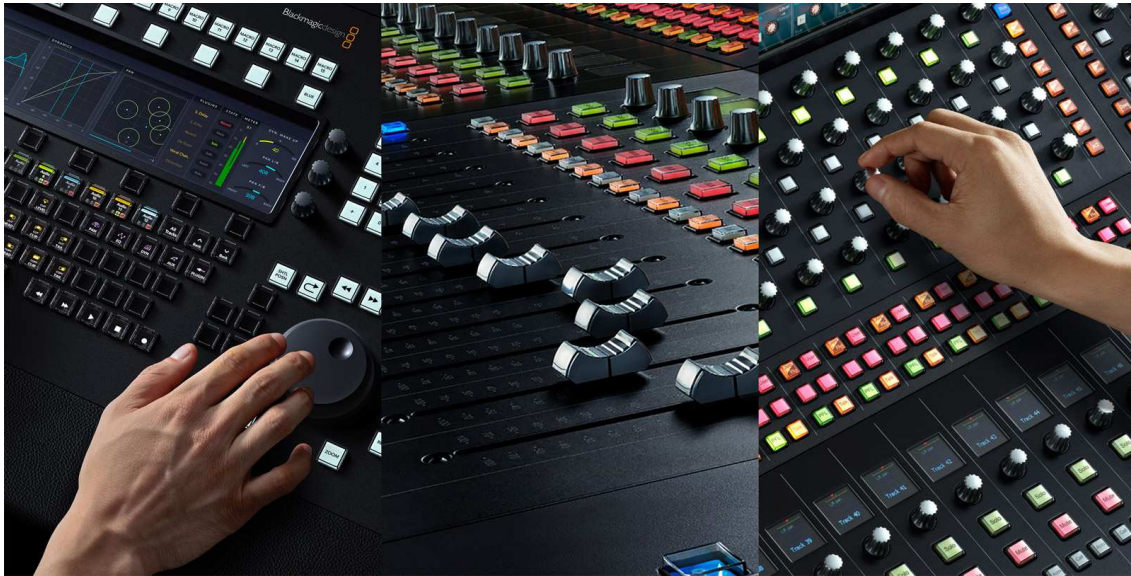

## Powerful Mixing

Create complex compositions and multiple delivery formats!

Each track corresponds to a channel strip on the mixer. You get real time 6 band parametric EQ, along with expander/gate, compressor and limiter dynamics on every single track. In addition, clip time warping lets you stretch or compress audio without shifting pitch. It works at the subframe level for absolutely perfect synchronization! The powerful bussing structure has several main, sub, and aux buses so you can prepare multiple deliverable formats all at the same time!

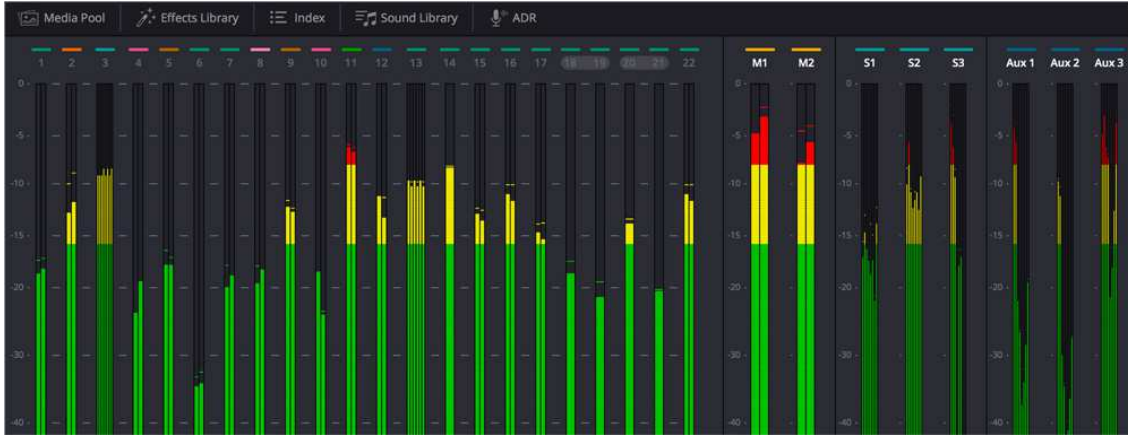

## Fairlight Professional Consoles

Modular and upgradable desktop or free standing consoles!

Fairlight mixing consoles provide high quality controls for nearly every parameter and feature in the software. Unique user interfaces and fast to use buttons and controls allow quick mapping of the console keys into a configuration that is optimized for the task at hand, allowing you to work faster with Fairlight audio than any other tool in the world!

## Extensive Metering

See all sources and bus outputs at a glance!

The Fairlight audio page in DaVinci Resolve 14 provides extensive metering of all sources in your project. In addition to sources, you can also meter sub and aux bus outputs as well as view compound meters with phase and loudness.
