-

Blackmagic Design CINEURSASHMSSD Overview

Use the **Blackmagic Design URSA Mini SSD Recorder** to capture footage using widely available, relatively inexpensive 2.5" SSD cards. Record CinemaDNG or ProRes files, in resolutions up to 12-bit RAW 4.6K. The single-slot URSA Mini SSD Recorder features 6G-SDI input and output, with start/stop functions conveniently controlled by the camera. This compact recorder sandwiches neatly between your URSA Mini and its battery, drawing power through the battery plate via a 12-pin Molex connector.
