Canon XA30

XA30

The compact XA30 camcorder boasts a wide dynamic range and is ideal for discretely capturing accurate, professional-quality content for corporate videos, weddings and online use, among other applications – especially in challenging high-contrast lighting conditions.

Benefits

- Wide 26.8mm¹, f/1.8-2.8 lens, 20x zoom with intelligent 5-axis OIS and Dynamic IS
- 1/2.84" HD CMOS Pro sensor with improved sensitivity for enhanced low-light performance and lower noise
- Wide DR mode (600%) and Highlight Priority mode² maintain highlight/shadow detail for a more natural image
- Dual-format recording: Full HD AVCHD (28Mbps) or MP4 (35Mbps) to 2 x SD cards
- Detachable handle with professional XLR inputs and built-in IR lamp
- 8.77cm (3.5") OLED touchscreen for excellent resolution, contrast and colour reproduction
- 1.56m dot EVF and 45° tilt for flexible shooting
- Fast and slow motion (x2to x1200) with interval recording in MP4 mode
- $\bullet \ \ Built-in\ dual\ band\ Wi\ Fi\ for\ remote\ control, file\ transfer/upload\ and\ browser\ preview$
- GPS capable with optional accessory

Detailed Features

Take a more detailed look into the Canon XA30

20x zoom wide angle Canon HD video lens

Capture superb quality footage thanks to the XA30's stunning and versatile 26.8mm¹ wide angle lens. A 20x zoom gets you up close to the action, while Dynamic Optical Image Stabilisation compensates for shake in 5 directions to provide ultra-steady images. f/1.8 maximum aperture, an 8-blade iris and EDM technology enable beautiful 'bokeh' effects.

Improved 1/2.84" HD CMOS Pro sensor

The newly developed Canon HD CMOS Prosensor achieves an effective pixel count of approximately 2.91 megapixels to deliver stunning Full HD picture quality. With increased sensitivity and an improved signal-to-noise ratio, low light images in particular appear cleaner with reduced noise.

Flexible new image settings

Two new picture settings help you achieve even more impressive results. Wide DR mode gives you a 600% dynamic range, resulting in bright images with high contrast that retain detail in both highlight and shadow areas, without the need for post-production. Highlight Priority mode reproduces footage with more natural tones, richer colours and detail particularly in areas of high brightness² perfect for scenes with bright skies and reflective surfaces.

8.77cm (3.5") OLED touch screen and tiltable EVF

Despite its compact size, the XA30 provides high-quality monitoring. An easy-to-use OLED touch screen with a 1.23 million dot resolution offers faster response times and superior definition, contrast and colour reproduction compared to LCD equivalents. A 0.61cm (0.24") 1.56 million dot EVF can tilt up to 45° - easily accommodating a range of shooting positions.

Versatile dual-format recording

AVCHD video can be recorded at up to 28Mbps in 1080/50P; while for maximum quality, select the 35Mbps 1080/50P MP4 recording mode. The two SDXC/SDHC memory card slots allow for simultaneous recording of high-quality HD and lower resolution MP4 files for easier file transfer – ideal when a quick turn-around of footage is needed. Fast and slow motion recording options with interval recording (x2 to x1200) are available in MP4 modes.

Professional audio

The XA30 features comprehensive audio control. Two XLR terminals provide professional connectivity, while high quality linear PCM and Dolby Digital recording options come as standard.⁴ A built-in microphone and 3.5mm input jack offer extra choice and flexibility.

Infrared shooting

The XA30 can easily be used at night or in low ambient light conditions thanks to the improved sensor sensitivity and bright infrared light source built into the

handle - making it ideal for the wildlife videographer.

Built-in Wi-Fi, expandable for GPS

Transfer footage wirelessly using an iOS phone or tablet, or via FTP at up to 150 Mbps⁵. Remotely control camera functions through a Wi-Fi enabled device with no need for separate apps. Location data can be recorded using an optional GPS accessory.

Compact, lightweight body

With its detachable handle, this discreet and highly portable camera is ideal for shooting in sensitive or confined environments. Its lightweight body reduces fatigue during extended periods of hand-held filming.

- 1 35mm equivalent
- 2 Monitor brightness settings may need to be increased
- 3 Simultaneous recording not available in 1080/50P recording modes
- 4 Linear PCM audio available in AVCHD 28Mbps recording mode only
- 5 Wireless internet access point required for FTP file transfer
