

# NewsScroll 4.1

Multiple Crawls, Logos, and Much More

## New Features in 4.1

- ▶ Direct Text Entry by Double Clicking
- ▶ Enhanced Data Box Integration for Text, Web, and XML Files
- ▶ Open Offline GenCG by Double Clicking Color-Coded Template
- ▶ GPI Trigger Commands for Toggling On/Off Mode
- ▶ Easily Switch Modes with the Crawl, Cut, and Schedule Tabs

## Channel Branding Solution for Any Production

The Compix NewsScroll software provides the opportunity for multiple scrolls, logos, and more all with a single channel. This software package allows you to simultaneously display the following:

- ▶ Two independent scrolls that can be updated manually or automatically from RSS feeds
- ▶ Two static or animated logos
- ▶ Real-time customizable clock
- ▶ Updateable Data Box integration for text, Web, and XML files
- ▶ Television content ratings (static only)
- ▶ Instant text update field for last minute additions
- ▶ Display static GenCG pages without closing NewsScroll
- ▶ Fully customizable Scheduler

# NewsScroll 4.1

## Greater Flexibility

You can adjust and save the positioning of each item to any area of your video output screen. In addition, you are able to save attributes of each item for instant retrieval.

## More Than Just a Crawl

Our new Rollup feature will enable you to roll up text, whereas in the previous version only crawl was available. This feature can be applied to both data streams.

## RSS Feeds Made Easy

The RSS feature within NewsScroll couldn't be any easier to use. Simply copy and paste your RSS feeds into the appropriate space within the upper and lower crawl fields, set a refresh rate, and NewsScroll will load all information for display.

## Automatic Updating

In addition to the two independent crawls watching separate RSS feeds, NewsScroll can also watch a text file for upcoming information. Once the text file is modified and saved, the crawl automatically updates on its next loop cycle.

## Software Options

Compix has created software titles that work specifically with Compix live video graphics solutions. This insures 100% compatibility, reliability, and quality.

Our suite of software, GenCG, NewsScroll, and AutoCast, are designed to be user friendly yet have the broadcast logic you need to get the job done.
