

BC-80

HD Block Camera

The BC-80 Block Camera is a small HD camera with an infra-red remote control.

It can be used for HD high quality shooting within a limited space and supports resolutions up to 1080p60.

The BC-80 provides 30x optical zoom and the image output interfaces are SDI and HDMI.

The BC-80 supports SONY VISCA protocol enabling the camera to be controlled via RS-422 or DVIP interface and the built-in tally light indicates when it is active.
