

Datavideo DAC-9P HDMI TO HD/SD-SDI CONVERTER

The Datavideo DAC-9P allows users to connect HDMI devices to professional SDI equipment, like video switchers or recorders up to 200 meters away.

HDMI is not suitable for long cable runs, but using a Datavideo DAC-9P, users can convert HDMI to High Definition & Standard Definition SDI and take advantage of the high quality and affordable connectivity that SDI cables offer.

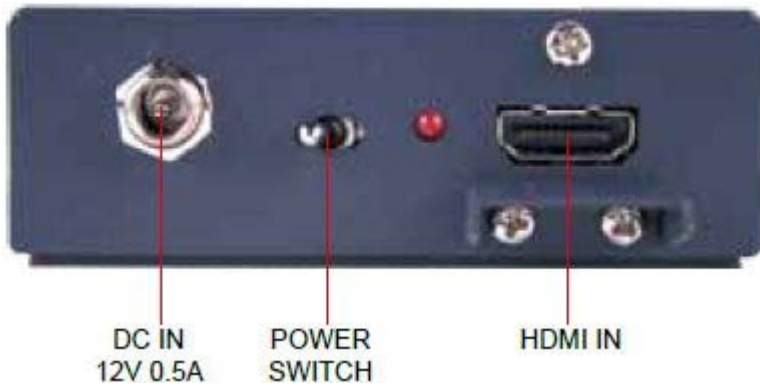

The DAC-9P even embeds the audio from HDMI into the SDI signal so only one SDI cable is needed.

Features

- Video input:
1 X HDMI
 - Output:
2 x SDI (HD / SD SDI)
 - Enables long cable runs
 - Rugged case design
 - Audio can be embedded within SDI output signal
 - PAL / NTSC Compatible
 - Tripod Mount via Velcro straps (Supplied)
 - DC 12V Operation
- 480i/576i
