

HBT-11

HDBaseT Receiver

The HBT-10 (/product/HBT-10) HDBaseT transmitter and HBT-11 receiver provide a maximum transmission distance of 100 meters. The pair supports video transmission up to 4K resolutions over Ethernet. With a 48V power source connected to the HBT-11 HDBaseT receiver, the HBT-11 can also remotely power the transmitter using Power over Ethernet (PoE).

The HBT-10 transmitter can power external devices from the 12V/30W DC output. DVIP control can be achieved over the same Ethernet cable. In other words, HDMI video, DVIP control signals and Power over Ethernet (PoE) can be transmitted between the transmitter and the receiver using a single Ethernet cable.
