

# LBK-1

## Look Back Kit

LBK-1 is a convenient way for reference prompting. If you are live in a chromakey ("Green screen") studio and you want to know where you are in reference to the background. In chroma key ("green screen") studios it's often hard to know where you are in reference to the background. Therefore you would often use an extra monitor however that means looking away from the camera. LBK-1 uses a two way mirror and a 22" LCD screen (screen not included) to give you a great view of what you're doing!

LBK-1 also includes a tally led that can be used to tell the talent that the camera is live or that the recording has been started.
