

NVD-30

IP Video Decoder

A wired IP video decoder with HDMI, Composite, and Analogue audio outputs. The NVD-30 decodes all common IP streams including RTP/RTSP, RTMP, UDP, HTTP, and MPEG-TS. It can output SD/HD video at resolutions up to 1080p60.

The NVD-30 is a perfect partner to the Datavideo NVS-25 (<http://www.datavideo.com/product/NVS-25>) H.264 encoder for a full HD point to point video link workflow over Ethernet, WiFi, or the Internet.
