

# TELEPROMPTER for Apple iPad™ and Android™ Tablets TP-300

The Datavideo TP-300 Teleprompter utilises the power and functionality of the tablet transforming it into a professional, fully-featured teleprompter, ideal for all location work, especially newsgathering.

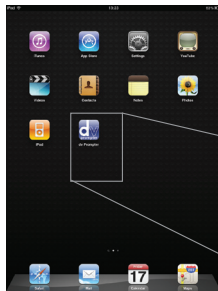

The unit allows to mount various tablets from 7" to 10" screens securely and easily.

The Datavideo prompter Kit TP-300 can be used in either a theatre setting, or a video studio. Prepared scripts or cue sheets can be easily copied and pasted into the DV prompter app software (available for iOS and Android devices) and scrolled at a set automatic rate or controlled by a user with the wired/ wireless remote for a more natural result. A number of clear fonts, colours and text sizes are available making reading comfortable from a variety of distances.

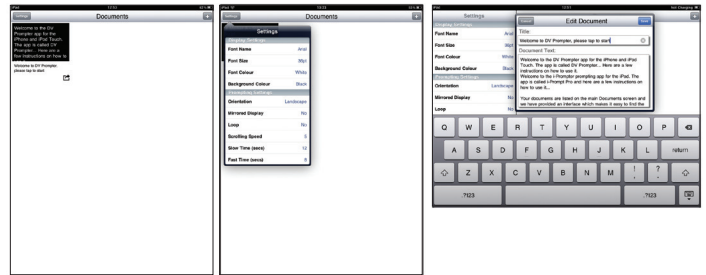

With a new mounting system, the TP-300 can be quickly and easily adapted to hold a variety of tablet devices.

## SOFTWARE APPLICATION & REMOTE CONTROL

The dv prompter application is available to download Free from Apple™ App Store™ and the Android marketplace

Control speed of your prompting script, or jump between break marks, with the remote control. Optional for iPad™ or Android™.

Easy and quick overview of all your document scripts.

Fast Script Download to TP-300's software via simple email cut and paste text copying, with instant Script Editing and Timing – use DV Prompter's in-built text editor for those last minute changes to content and timing.

Change background colour, font type & size and many other features direct via the interface on the tablet on the fly.
