

# VP-840

## 4K HDMI Distribution Amplifier 1x4

The VP-840 is a 1x4 HDMI Distribution Amplifier featuring the capability to repeat HDMI source to 4 displays simultaneously, VP-840 supports data rates up to 18Gpbs and resolutions of 4K2K@60Hz.

The VP-840 features EDID (Extended Display Identification Data) management providing multiple EDID options for various resolutions between all devices, ensuring the HDMI source reliably outputs the correct content for the display.
