

The amazingly advanced and totally re-engineered HD-Series from Glidecam Industries represents the top of the line in hand-held Camera Stabilization.

The lightweight and state-of-the-art Glidecam HD-1000, HD-2000 and HD-4000 hand-held Camera Stabilizers will transform your hard to watch, shaky camera footage into hypnotically smooth, professional footage.

The Glidecam HD-Series offers advanced features and a degree of sophistication never before seen in a line of Hand-held Camera Stabilizers.

With the Glidecam HD-Series hand-held Stabilizers your camcorder seems to float, always balanced, isolated from your hands undesirable motions. Now you are free to move with your camera - panning, tilting, booming or running without any camera instability or shake.

The Glidecam HD-Series works so well that it allows you to shoot incredibly smooth and graceful shots even while going to extremes like running up and down stairs or traveling over rugged terrain. And when it comes to normal shooting, like walking or moving the camera slowly around someone, the results are equally magical.
