

PRODUCT DESCRIPTION

The VL-2000S is a fully simultaneous 2-channel Li-ion V-Mount battery charger with a 100W DC output (4-pin XLR). Supporting LIFE PLUS mode, the latest advances in charging technology, the VL-2000S can extend battery life up to 20%. The VL-2000S features Power Base mode – the ability to utilize the mounted batteries for powering equipment via the 4pin XLR output. Low voltage batteries are safely charged with the ‘Recovery Charge’ mode. The charger also houses energy efficient circuitry that will automatically power down the charger when inactive.

PRODUCT FEATURES

- Simultaneous 2-channel lithium-ion battery charger
- Quick Charge – Up to 4A Charge Rate
- LIFE PLUS mode – Increases battery life by up to 20%
- Recovery Charge mode – Safely charge low voltage batteries
- PowerBase mode – Allows VL-2000S to provide battery powered DC when the AC mains is not available or becomes disconnected
- Integrated 100W DC power supply provides 100W XLR output for the camera, lighting or ancillary broadcast devices
- Recovery Charge mode – Safely charge low voltage batteries
- VL-2000S compatible batteries: All ENDURA Li-ion V-Mount batteries
- Internal safety features protect both the battery and charger from serious damage should faulty or misused batteries be placed on charge. The VL-2000S will automatically stop charging should any battery reach an over voltage condition

- Universal AC input voltage for worldwide operation.
-
