

## PRODUCT DESCRIPTION

The VL-2X delivers slim, lightweight 2-channel charging with the added advantage of an integrated 36W power supply. With a new fanless design, the VL-2X also delivers high power charging without the noise of a typical quick charger. The VL-2X is a multi-chemistry charger for both Li-ion and Ni-Cad battery types.

---

## PRODUCT FEATURES

- Sequential 2-channel charging in either position. The VL-2X will charge the first battery connected to either VMount channel, automatically switching to charge the second battery after the first is fully charged.
  - Integrated 36W DC power supply provides 36W XLR output for the camera, lighting or ancillary broadcast devices.
  - Compact, lightweight charger body (3.4inches in width / 0.97lbs in weight)
  - Advanced fanless design
  - Integrated locking support stand
  - Internal safety features protect both the battery and charger from serious damage should faulty or misused batteries be placed on charge. The VL-2X will automatically stop charging should any battery reach an over voltage condition.
  - System includes 60W AC-Adaptor Power Supply for power
-
