KRAMER

## Kramer Network
Enterprise Management Platform

Kramer Network is a powerful, allencompassing, modular Enterprise software platform that lets you easily operate, manage and maintain all your Pro AV, IT, IP streaming, and control in one simple singlepoint Webbased interface

FEATURES

User-friendly Web-based GUI - Easily access and use from anywhere, anytime

Automated Device Detection - The platform instantly and automatically identifies devices in the network, reducing configuration time

Enhanced Security - With intuitive user access management, Kramer Network allows only certain users to access specific audio or video sources, rooms and predefined scenarios

Visual & Topology AV System Mapping - Easily drill down to a specific network, site, building, or room to start managing AV devices

System & Connection Status at a Glance - Quickly identify critical issues in the network, see logicalvideolink status at a glance

Remote Maintenance - No need for onsite visits

Control over IP - Builtin controller supports virtually unlimited number of controlled devices with rich driver library of 3rd party devices. Supports a new line of I/O devices

Virtual Matrix - Click and connect any source to any destination and create predefined scenarios for video and Dante™ streams

Enterprise Grade Management - Enables total user management, authentication, three builtin user levels and user access rights management

No Programming Required - Install and start using the platform in minutes with no need for programming

Scales to any Size Installation - Support hundreds of devices simultaneously
