## Description

The greenMachine approach is unique. The hardware itself is a powerful general purpose audio and video processing appliance that is custom configured using a selection of APPs which are purchased and downloaded from the greenStore<sup>®</sup>.

The greenMachine titan platform provides for simultaneous processing of up to four 3G SDI signals or a single 4k/UHD SDI signal.

Input for 4k/UHD can be either 4x 3G SDI (Quad Link) or 12G SDI (Single Link). Conversion between Single Link and Quad link 12G SDI signals is possible using greenMachine APPs.

Without any APPs installed the hardware has no real functionality aside from very rudimentary setup functions for basic configuration like IP settings and I/O signal monitoring as well as conversion between SDI and HDMI or Fiber.

## APPs

(Examples only - many more are available at the greenStore<sup>®</sup>)

**Frame Synchronizer** This utilizes robust "gywheel" synchronization that will accommodate a wide variety of low quality asynchronous SDI sources. All embedded audio is extracted and delayed automatically to match the video processing delay. Audio is free from disturbances even when dropping and adding frames...

**Embed/De-embed** A high quality multi-format audio embedder and de-embedder application which can embed and / or de-embed up to 16 mono audio channels in the SDI channel. The embedder can also embed DolbyE signals which in conjunction with the Frame Synchronizer APP will always maintain the Guardband...

**Scaler / Video Converter** A broadcast quality conversion APP that provides a multitude of conversion and scaling possibilities. The powerful input cropping functionality enables a full Region of Interest (ROI) selection and in addition, the output image size can be adjusted...

**Audio Processing** This provides a multitude of audio processing functionality. Each mono audio channel has gain adjustments, mute and inversion, stereo to mono mix-down plus silence and overload monitoring and a 1kHz test signal generator...

## Options

### RFR 6000 - 1RU 19" Rack Mount Chassis

Rack mounting hardware which can accommodate one or two greenMachines in 1RU of rack space which also securely mounts the primary and redundant power supplies.

### RPS 6120 - Redundant Power Supply

A second external in line power supply for redundant power protection.

### Fiber Options

The titan is equipped with three SFP sockets which can accommodate a variety of plug in SFP fiber I/O options. Two sockets are for SDI connectivity and the other is for Ethernet. Fiber options can be added at any time.
