

R FR 3600

Testor Hard Case 1

NEW

Protect your investment with this durable Hard Case option for Testor.

Ideal for mobile applications, the strong moulded ABS plastic case provides water resistant, crush proof and dust proof protection for the test generator. The Testor is securely mounted and operated while in the case and the integrated high capacity fan provides maximum cooling ensuring the Testor will operate normally even in the most demanding conditions. The case features a fully integrated AC power supply plus a USB port and the LYNX desktop controller application for control and configuration from a PC.

An external DC input connector is provided to accept connections from the optional LYNX RPS 3100 rechargeable battery pack (which will provide about 3 hours of continuous use), or the RPS XLR camera battery adapter.

Features

Compact, robust ABS plastic case (185 x 127 x 77 mm)
Water resistant, crush proof and dust proof protection.

Permanent and secure mounting of Testor

Integrated AC power supply.

Integrated USB controller for PC control and configuration.

External DC input connection for the optional RFR 3100 rechargeable battery or the RPS XLR camera battery adapter.

Integrated cooling fan.

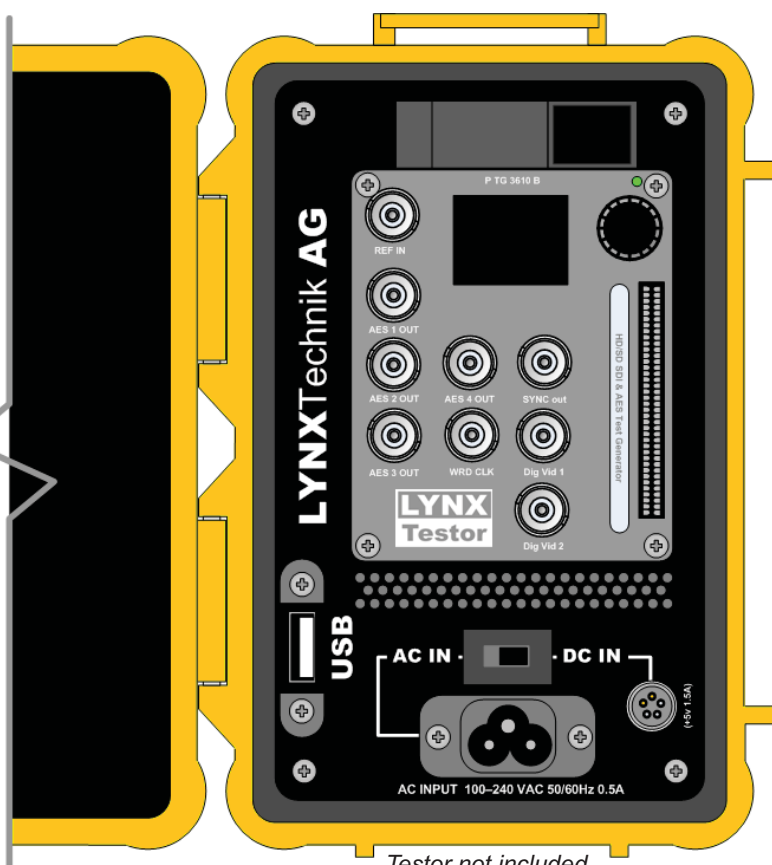

Automatic pressure equalization valve (removes risk of case bursting open on aircraft during transportation)

Lanyard.

Large easy open latch.

Note. Upgrade customers will need to return the Testor for factory retrofit into the case.

Genuine custom PELICAN™ case

Testor not included
