NEW! CONVENIENCE & CONNECTIVITY for MXO2 USERS

Matrox® MXO2 Dock

Today's MacBook Pro and MacBook Air are powerful enough for many Matrox MXO2 users but when you're in the studio it would be nice to have more screen real estate to fuel your creative process. Matrox MXO2 Dock lets you enjoy the productivity benefits of your MXO2 and superior comfort of an affordable full-size HDMI display to complement your laptop display. In addition, it lets you get the most from your Thunderbolt port by letting you also add a full size keyboard, a mouse, a wired network, USB 3.0 storage, and many other peripherals using a single cable.

Easily create your ideal ergonomic workspace!

THUNDERBOLT™

One-cable convenience

Save time everyday – come and go without disconnecting and re-connecting all your devices. One Thunderbolt connection does it all. Tame the cables cluttering your desk and save wear-and-tear on your laptop.
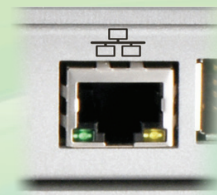

SuperSpeed USB 3.0

Matrox MXO2 Dock adds an easily accessible SuperSpeed USB 3.0 port to your system. Transfer data 10 times faster than standard USB 2.0.
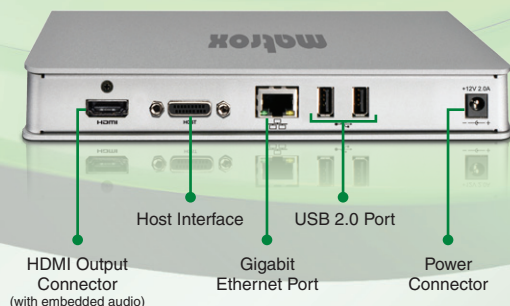

Gigabit Ethernet for all

Matrox MXO2 Dock adds gigabit Ethernet access to laptops that do not have a built-in gigabit Ethernet port. Transfer data 18 times faster than WiFi and offload traffic from your WiFi network.

Expand your connectivity

In addition to the Host interface to connect your MXO2 I/O device, two USB 2.0 ports let you connect anything else you need — full-size keyboard and mouse, storage, optical drive, control surface, flash drive, and other peripherals.

HDMI Output Connector

Host Interface

Gigabit Ethernet Port

USB 2.0 Port

Power Connector

Daisy chain setup

Matrox MXO2 Dock is the last device in your Thunderbolt chain. Conveniently positioning your Thunderbolt storage with pass-through between your laptop and your MXO2 Dock lets you easily remove just your laptop, or your laptop plus storage, with a single disconnection.
