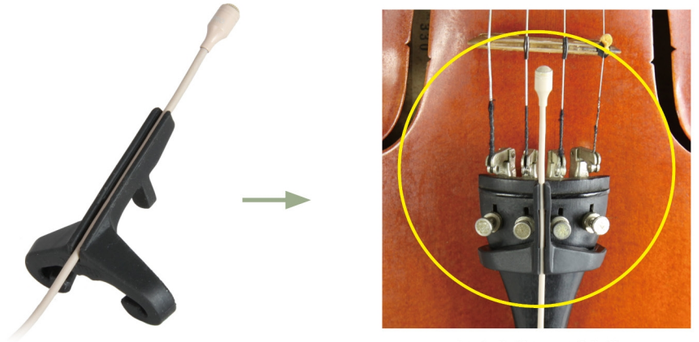
VM-22 Violin Microphone Set

The MIPRO VM-22 violin set has been designed after years of collaborating with professional musicians. It fits snugly, is easy to install and remove and protects these expensive instruments from surface scratches. It can be strategically placed in positions that pick up the accurate sound of the instrument while minimizing handling noise during performance. Each set includes the following components.



Installation on Violin

VC-22 Violin Microphone Cable

For audio output, connect the VM-22 with a VC-22 cable.
Two connecting methods:

(1) Wireless: Connect the VM-22 with a VC-22 cable to any MIPRO ACT-series bodypack transmitter for wireless transmission to a matching receiver hooked up to a PA system.

VC-22 VM-22 Receiver PA system

(2) Wired: Connect the VM-22 with VC-22 to a MJ-53 condenser microphone adaptor and plug into a PA system.

VT-22 Wireless Violin Set

The VT-22 wireless violin set is designed for a cable-free, truly wireless violin audio performance. No external connecting is required. Simply integrate the miniature, lightweight T-22 transmitter to its proprietary violin mount. This attaches snugly to violins and is easy to install and remove while protecting these expensive instruments from surface scratches. Strategically placed in flexible positions, they will not interfere during performances.
