PTZ Camera Auto Tracking Software

AW-SF100

- AW-SF100 PTZ Auto Tracking Software
- Compatible with AW-HE130, AW-HE40 and AW-UE70 Series PTZ cameras
- Enables PTZ camera to track an object automatically without the need of a camera operator

Panasonic is excited to introduce a state of the art auto tracking software, AW-SF100, which dramatically simplifies PTZ camera operation in classrooms, lecture halls, auditoriums, stage environments, etc., by enabling compatible PTZ cameras, AW-HE130, AW-HE40 and AW-UE70, to automatically keep track of a speaker or a lecturer.

Auto Tracking Software Key AW-SF100

Auto Tracking Software AW-SF100

Utilizing a template matching and motion detection technology in conjunction with high quality streamed video over IP, the AW-SF100 auto tracking software allows for automated tracking of the person/object without the need for any external devices or transmitters. The tracking technology is fine-tuned to keep tracking a person even when he/she turns away from the camera.

Though one PTZ camera works at one time on one software, up to 10 PTZ cameras can be registered to one software, which helps you to switch between the cameras with just a few clicks.

Key Features of AW-SF100:

- Automated PTZ Control Tracking using template matching and motion detection technology, using (AW-HE40/UE70/HE130)
