PANASONIC SECURITY SYSTEMS: THE PERFECT CHOICE TO PROTECT **YOUR BUSINESS**

No matter what business sector you operate in, Panasonic has a complete security system to suit your individual needs. We offer a wide range of options for analogue set-ups with components designed for the most extreme operating environments. Features include real time recording, water and dust resistance, intelligent motion detection. In short, whatever the security requirements of your business, Panasonic can deliver an utterly dependable solution.

FIND YOUR WAY AROUND THIS GUIDE

This brochure has been designed to be easy for you to specify a complete system as well as browse and compare our individual products. It divides the range into two simple sections; analogue products and lenses. Many of our cameras are available with a choice of lenses to suit different situations and environments, and we have included a handy comparison chart to help you select the camera/ lens combinations that are most appropriate for your particular application.

*Because of monitor over scan, actual images seen may differ slightly from those shown here.

**"Capture image" is the area included in the image by the camera. "Ratio" determines the proportion of this area occupied by the subject in the image that appears on the monitor (Height). If the subject fills the whole screen with the ratio set at 100%, reducing the ratio to 50% will make the subject only half as large.

*When the distance from the camera to the subject is 10 m or more, set both distance to subject and lens focal length to 10x.
