The BK-PXWZ150 Backpack is designed to hold a compact HD camera and accessories. The case is made using abrasion-resistant 1000-denier Cordura nylon material. The frame is made using a lightweight, 1-inch thick foam for extra protection for the camera and other contents. The interior is lined with soft Veltex material that prevents scratching of equipment and also allows the interior padded dividers to be placed in any position throughout the interior. The Veltex acts as a connector for the Velcro tips of the padded dividers.

The BK-PXWZ150 strap system allows you to use the comfortable backpack straps or single-strap "slinger" format. The straps have thick padding and are lined with soft mesh material to maximize air-flow between the backpack and your body. The backpack straps tuck away when not in use.

There is a side pouch that carries small tripods and 3 exterior pockets to hold additional accessories. There is also an interior pouch for a tablet computer (iPad compatible) with a clear vinyl cover so the tablet can be used while in the case.

- Strap system that converts from backpack to slinger
- Thick padding and soft interior lining
- Tripod carrying pouch and cinch system
- Tablet pouch that allows the tablet to be used while stored
- Comfortable straps and suede leather handle for carrying
