CBA-HPX600

Camera BodyArmor for Panasonic broadcast cameras is a custom-fit, padded, protective cover made using a water-resistant, highly abrasive-resistant, soft-feel fabric. Camera BodyArmor protects your camcorder from bumps, hits and scratches. It also reduces the risk of camcorder damage due to precipitation, dust, and other harsh conditions. The back end is expandable to accommodate various sized batteries and wireless microphone combinations. All CBAs for broadcast cameras include a reversible, pull-out Rain Top that's white (reflective) on one side for shooting in the hot sun and black on the other side for cold shoots and rain. The padded interior of the CBA is lined with breathable Leno Mesh to maximize airflow between the cover and camera.
