## CC-HD2ORB

The new CC-HD2ORB is a rolling Quick Draw Camera case for a full size BROADCAST camera and tripod combination. Easier to navigate gear through narrow doorway and elevators in one safe easy trip. A tough, light weight frame protects all sides including a wide viewfinder guard space for most battery and lens lengths. Outside pockets for spare battery, cable, and some matte boxes help organize the gear. A removable, modular 17" laptop case can be used separately for field editing. Inside is a Slip-Not bottom, fabric covered padded blocks that assure a nice firm camera fit. A great case for Camera Body Armor and Shoulder Case camera covers. Extra height allows for many on board lights, tripod plates, wireless microphones and more. The interior width including the viewfinder guard is 12.5 inches, without including the width of the viewfinder guard the case is 9.25 inches wide.
