Looking for a lightweight, highly-protective compact case for the Blackmagic Design URSA Mini Pro? Then the CTC-URSAMINIPRO Traveler-Style Camera Case is the perfect case for you!

The CTC-URSAMINIPRO fits the Blackmagic URSA Mini Pro camera, with or without shoulder pad, lens and viewfinder. The case has a specially designed padded EVF compartment for protecting the delicate viewfinder, which allows you to spend less time and energy breaking down your URSA Mini Pro compact camera rig.

The Traveler is constructed using abrasion-resistant ultra-durable Cordura® Nylon (1000-denier) for long-life reliability in harsh field conditions. Portabrace Cordura material is also woven with an extra layer of water-resistant

treatment and is cold-crack tested at -40°F for 4 hours. The case also has one-inch thick foam padding, reinforced by hollow-core plastic on the bottom and sides that combine to provide maximum protection in a lightweight format. A layer of non-slip, water-proof material has been added to the exterior bottom panel of the case to provide even greater protection against water and dirt when the case is placed on the ground. This waterproof layer can easily be wiped clean. The Traveler Case is sewn using triple bonded nylon threads and our all thread-ends are flamed to extend the life of the case and strengthen seems. Back-tacking stitch methodology is used to create superior strength along seams and at the connection points of the carry handles and solid-steel strap rings.

During transport, the padded side walls fit snugly against the camera. A camera cinch is included, which straps around the camera and pulls tight for added stability. A padded foam support block (CC-STUFFER) is also included, which sticks to the bottom of the case using Velcro® to support the lens and provide an extra level of protection against bumps when you're on the move. There's a removable padded Lens Cup perfect for protecting a spare lens. The Lens Cup has Velcro® to stick to the interior of the case, or it can be pulled out and worn on your belt using the belt-strap feature. A soft, padded CS-B9 accessory pouch is perfect for providing extra protection and organization to small accessories inside the case.

The case is designed with a single, extra durable YKK® zipper that opens the case up wide to make accessing the camera quick. There's a "zipper hood" made using Cordura® material that runs the length of the zipper in order to extend the life of the zipper and prevent water from rain or splashing to get inside the case. A padded genuine-suede shoulder strap is included for superior carry comfort and durability.

There is a single 6-inch x 3-inch x 5 inch exterior pocket ideal for carrying additional small accessories. This pocket has a press-pass / ID window for conveniently displaying your credentials. An additional, longer exterior pocket (12-inch x 3-inch x 4-inch) is ideal for a shotgun mic or grip-control and arm.
