## MO-17G

The all-new MO-17G Flat-Screen Monitor Case has a new rigid frame lined with foam padding and equipment "stuffer" blocks to protect and stabilize your 17" monitor.

The rear mounting-bracket canopy allows you to leave bulky brackets attached to the back of your monitor during transport. The folding protective sun visor shields the screen from unwanted glare while use.

Carry the MO-17G using the comfortable suede shoulder strap (included) or the nylon side handles. The anti-skid bottom adds an extra layer of protection from water and dirt and helps stabilize the monitor for field use.
