

AUDIO CAMERAS COMPUTERS LENSES LIGHTS **MONITORS** PRODUCTION GEAR TRIPODS HARD CASES

MO-LH910B

The Flat Screen Field Monitor Case (MO) is made using 1000-denier Cordura® material and is custom-fit to a specific Panasonic field monitor. There's a fold-out anti-glare visor that improves screen visibility while using the monitor outdoors. A "Quick-Slick" rain cover is included and can be used to keep the monitor, battery and cables dry during an unexpected rain shower. A sturdy stand folds out to angle the monitor for optimal viewing. The bottom of the case is lined with anti-skid, waterproof material to provide a solid protective base.

The stand and visor fold back into the case and the entire unit folds into a protective compact case for carrying over the shoulder. A comfortable suede-leather HB-1040 Shoulder Strap is included and can also be used around the neck to support the monitor while viewing.

We also suggest: The monitor in its case (MO-LH1710) stores perfectly in the PB-2700DK and PB-2750DK for shipping.
