The PB-SXS Memory Card Organizer is a durable case that holds, organizes and protects your memory cards. The outside of the case is made using 1000-denier Cordura® material to provide maximum protection in a foldable case. The inside of the case is lined with soft platinum veltex and there is a layer of padding in between to cushion the memory cards. Clear vinyl pouches hold memory cards securely in place during transport.

The PB-SXS is designed to carry 9 Sony SXS, Panasonic P2, SanDisk or other memory cards of comparable size. The case has touch fasteners positioned on its seams to help keep it closed and folds to fit into your camera bag, backpack or handbag. There is also a belt-loop for quick access to your cards while shooting.
