The RIG-5SRK Camera Case with interior kit is designed to carry camera rigs fully assembled or with minimal disassembly of the rig components. Ideal for short and tall rigs (like C300 rigs with shoe mount viewfinder), this large and extremely flexible case is durable and complete with accessory items that will assure your gear is held safely and comfortably in place.

Arrive at your venue in Shoot Ready format knowing everything you need is packed, organized and accessible. The case is made from rugged 1000-denier Cordura® and features 1" thick padding surrounding a hollow-core plastic frame. The bottom is bolstered by a layer of waterproof rubber to assist with ground protection. It's carried by its two top suede leather carry handles or removable suede leather shoulder strap.

The main compartment is accessed via strong YKK® zippers and a secure Velcro strip along the front flap. The compartment is empty and can be configured to meet your needs using Porta Brace's included 7 x 13" divider, Camera Tie-down Cinch and Camera Support Block (foam block). The case also comes with two padded lens cups and a handy white balance card. Two large accessory side pockets are accompanied by a front slip pocket for various accessories.

Since video rigs can be heavy, the RIG-5SRK comes with a convenient rear trolley sleeve that allows you to load this case on top of a rolling luggage cart (not included). Cameras and Equipment not included.
