The Cargo Case Camera Edition has an ultra-light design, featuring dual-rigidity foam for maximum equipment protection. The RIG-EVA1XT has been designed to add extra height to this case to accommodate your equipment needs in a better manner. It is designed to Panasonic AU-EVA1 setups up to 21.75" long. This rugged case is constructed using long-life materials including 1000-denier Cordura® nylon and solid steel clip rings. Reversed zippers

and a slip-not anti-skid waterproof bottom panel are used for increased water-resistancy and durability.

Arrive at your venue in Shoot Ready™ format knowing everything you need is packed, organized and accessible. The 9" interior height allows for shoot-ready equipment configurations and the easy-open, quick-draw design means you'll never miss the shot. There are front and back slip pockets for carrying SD cards, documents, cords, and white balance cards. The 2 side pockets are perfect for batteries, extra flashes, and cords.

The interior of the case is made using a copper-colored Veltex that contrasts against camera and lenses for clear visibility of the case contents. Completely customize your interior setup using the positionable interior divider system, including 1 horizontal divider, 1 hanging mic pocket, 1 padded divider pouch, camera tie-down, and divider camera "cradle".

Comfortable genuine suede shoulder strap and handles are included.
