For a limited time - SAVE \$50 on the new RS-DVX200! Price listed reflects \$50 discount.

The RS-DVX200 is custom fit to the Panasonic AG-DVX200 camera. It is made from waterproof Nylon Taslan material and complemented by a soft Tricot interior layer that protects the camera and reduces noise during operation. In addition to being waterproof (1000MM waterproof rating) the Taslan material is breathable (1000G/M<sup>2</sup> breathability rating), allowing heat from the camera to escape while the cover is deployed.

Clear Vinyl windows are used to provide unobstructed visibility of camera controls. Velcro-sealed openings are carefully placed to provide full access to controls and power supply without allowing water to seep in. The anti-skid rubber lens gasket creates a tight seal around around the camera lens.
