Product Description

Rain Slickers (RS) for JVC cameras are a customized way to protect your JVC camera from rain, dust and snow. The Rain Slicker exterior layer is made from Nylon Taslan material and complemented by a soft tricot interior that won't scratch your equipment. The Taslan material is both waterproof (1000MM waterproof rating) and breathable (1000G/MÂ² breathability rating), which keeps the camera dry while also preventing the camera from overheating. The Rain Slickers have extra material that can be extended for additional protection.

A clear Vinyl window provides an unobstructed view of the controls and a quick-change rear panel gives you easy access to the battery compartment. The detachable front visor keeps rain off the lens. A triple-zippered bottom makes tripod mounting easy. JVC Rain Slickers can also be used on the shoulder or hand-held.

BUILT TO LAST, SINCE 1972

Portabrace cases have been built by hand in Vermont since 1972. And while professional audio and video technology continues to change at a relentlessly fast pace, one thing has remained the same for over 40 years: our commitment to quality. From the highest quality materials, to the hand-built wooden equipment models, to the reinforced sewing techniques designed to strengthen weight-bearing contact points, our production processes are designed to make our cases the toughest and most reliable products available.
