Cabinet Speaker, MDF-Corpus, 15/6 W, 100 V, with control

Rating: Not Rated Yet

Price:

[Question on item?](#)

Description This cabinet speaker is made of coated MDF wood and is due to its thought-out construction absolutely swinging- and boom-free. In connection with the broadband high performance chassis an excellent speech and music playback can be reached. The design is modern, decent and is commented upon in a positive manner by architects. The rear panel and the comfortable spring snatch lock make the assembly substantially easier.

These cabinet speakers are also available with a fitted volume control (on the lower ohm side).

The control is positioned underneath (lateral, if speaker is mounted horizontally).

The control axis can be adjusted with a screwdriver after taking off the cover cap. It is possible to operate the selector by using the enclosed knob. This only has to be pushed on the axis.

Features

- The installed 100 V transformer enables the tapping to 1/1, 1/2 and 1/4 performance in each case.
- Drilled holes in the rear panel allow a horizontal or vertical attachment of the speakers.

- The models BCH-406 R/410 R are delivered with an installed volume control.
- The speakers are available in all RAL colours on request.
