

ELM-106

VARES-1000 Digital Microphone Station

Description

Description

ELM-106 manages announcements into one or more selected zones and all-calls. An expansion to handle 12 call zones is possible by the use of an optional six-button module

ELE-006.

Features

- On an overall bus length of 100 m on CAT7 cable up to ten pcs. ELM-106 can be connected to a single ESC-012A. For larger distances please use lower resistance cables.
 - With the extension module ELE-004 can be extended to a covered alarm button, three buttons for special functions and 2 fault LED's .
-
