

6-ZONE “VARIO-LINE” **SMALL CENTRAL UNITS**

VLM-100A | for collective call

Microphone intercom unit (condenser) with pre-gong and priority switching via RJ-45 socket.

Microphone-Talk Station.VLM-100A

VLM-106 | for 6 circuits

Digital microphone intercom for selecting the 6 individual loudspeaker lines. Pre-gong and collective call.

Microphone-Talk Station.VLM-106

Microphone-Intercom Unit. . . .VLM-106 WO
like VLM-106 but without RR-60 interface

Function extension module . .VLE-004
for remote control of special functions (via separate line)

VLM-206 | for 6 circles & text module

Digital microphone station for selecting the 6 individual loudspeaker circuits and for remote control of the digital text module DMT-10.

Microphone-Intercom unit.VLM-206

Microphone-Intercom Unit. . . .VLM-206 WO
like VLM-206 but without RR-60 interface

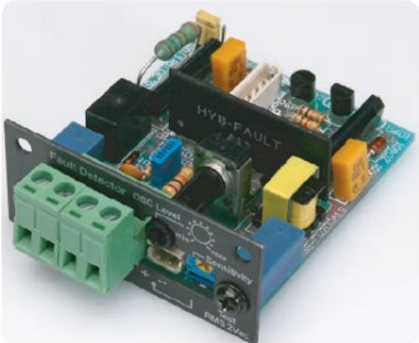

OPTIONAL | Pilot tone module

FD-21

Description

20 kHz pilot tone module
for monitoring the amplifier's functionality.

In addition to the review
the power amplifier, the volume
speaker line measured for short
circuit faults.
Error message through a potential-
free relay contact (normally open).

Pilot tone moduleFD-21
expansion module for the VLZ series

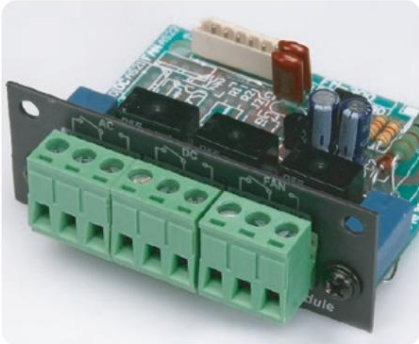

OPTIONAL | Error Monitoring Module

FM-30

Description

Error monitoring module.
3 potential-free relay contacts (NO/
NC).

Error message in case of AC or DC
power supply failure, error
messages in case of defective AC
or DC fuses and in case of fan
failure.

Error monitoring moduleFM-30
expansion module for the VLZ series

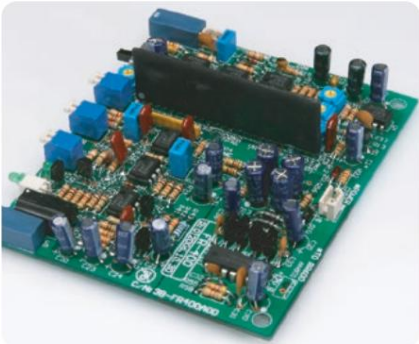

OPTIONAL | Frequency shifter module

FS-40

Description

Frequency shifter module for
suppressing feedback (only affects
input 1 of the VLZ).

The almost inaudible frequency
shifts of 7 - 10 Hz that are possible
with this can be particularly useful
when microphone announcements
are made in addition to the
background music.

Frequency shifter moduleFS-40
expansion module for the VLZ series
