

HAND CALL

RCS

Description

The **HMA-001G/Y/O** (green, yellow, orange) hand-held call points are used to control amok alarm systems. The inscription "**Amok alarm**" (replaceable) indicates the warning system directly.

The **HMH-001B** (blue) manual call point is used to control home alarm systems. With the inscription "**House alarm**" (replaceable) it can be connected directly to the trigger contacts of an electro-acoustic emergency warning system.

The manual call point **HMA-001W** (white) is specially designed for use in NGRS systems.

The manual call points are installed in a robust aluminium housing, which, in comparison to plastic housings, is resistant to the environment and can be used for years.

It is shatterproof, dimensionally stable and does not discolor in sunlight.

Please note the following features:

- The pivoting door with an opening angle of 180° has a replaceable glass pane.
- If the detector is triggered, the integrated blocking nose closing the door.
- All manual call points can also be combined with the AAS-200A, DMM-618B or the VARES series systems.
- Replacement glass panes and replacement keys are available as optional accessories available.
