

MS-201X

Desktop Microphone, XLR, balanced

Description

Description

Dynamic gooseneck desktop microphone with a newly developed slim desktop housing which also provides additional space for retrofitting special facilities. Through its discreet and functional design, the microphone station fits well into any environment.

Features

- A noise compensated dynamic cardioid microphone capsule is integrated in the gooseneck.
- All models are of balanced assembly, also the model with the 3-pin jack plug.
- The microphone station features high gain-before-feedback and a pop/wind screen. It has a 5 m connection cable fitted with the appropriate connector.
