- Smaller capacity cards allow for more efficient offloads.
- The 1TB and 512GB are shipping

AXS Card Adapter

AXS-A1TS24

AXS-A512S24

AXS-A256S24*

The new A-Series AXS Memory Cards now available in three storage capacities: 256GB*, 512GB and 1TB with guaranteed writing speed of 2.4Gbps. The 1TB card stores approximately 7.8 hours of 2K RAW at 24p, with over one hour of continuous High Frame Rate recording at 180 fps and 48 minutes at 240 fps.

AXS-Memory is specifically designed for RAW recording, with a unique combination of capacity, sustained data throughput, reliability and size. Thanks to its state of the art storage technology, A-Series AXS Memory cards enjoy a slim design, consume less power and run cooler than the original AXS cards. Given their smaller profile, each AXS-CR1 card reader and AXS-R5 ships with a card adapter. In the US, the new cards will begin shipping with the adapter in the box.

If you have purchased an AXS-R5 or AXR-CR1 card reader, we will send you an adapter for FREE. Proof of purchase is required. Promotion expires July 31, 2014. For rebate information, go to www.sony.com/prorebates

The original AXS-512S24 is discontinued

*Releasing in August 2014
