

## CBKHD02

SDI/Composite Video Input, Digital Extender, and 50-pin Interface Option Board for the PMW-500

SDI/Composite Video Input, Digital Extender, and 50-pin Interface Option Board for the PMW-500. NOTE: Initially, the CBK-HD02 only implemented the 50-pin interface for the XDCA-55 Camera Adapter for the Camera Signal Extension Unit. The installation of the CBK-HD02 option also activates the following additional features in the camcorder: SDI/Composite Video Input and Digital Extender. The 50-pin interface will also work with the HDCA-702 MPEG TS camera adapter to provide a MPEG Transport Stream output over a DVB-ASI connection.

### Highlights:

- SDI/Composite Video Input, Digital Extender, and 50-pin Interface Option Board for the PMW-500
- Initially supports XDCA-55 Camera Adapter for the Camera Signal Extender Unit
- Activates Digital Extender Function (requires ver 1.1 or higher camera firmware)
- Activates Pool Feed Input Function (requires ver 1.1 higher camera firmware)
- 50-pin interface supports connection of HDCA-702 MPEG TS adapter to camcorder (requires ver 1.1 or higher camera firmware)
