

**CBK-WA01**

Wi-Fi Adaptor for use with the XMPilot Planning Metadata Solution

The CBK-WA01 is a compact Wi-Fi adaptor for use with XDCAM HD422 Camcorders such as the PDW-700, PDW-F800 and PMW-500. When attached to the camcorder, it communicates wirelessly with laptops and other mobile devices running Sony's XDCAM Browser software, and with mobile phones supporting the XMPilot application.

(Wi-Fi capability on supported cameras must be enabled with the CBKZ-UPG01 software key.)

XMPilot extends the XDCAM metadata workflow to directors, location producers, production assistants and camera operators, reducing the length of time it takes to get captured material on-air, minimising ingest time, increasing post-production workflow efficiency and adding value to your archives.

This product comes with PrimeSupport – fast, hassle-free repairs and a helpline offering expert technical advice. Which gives you the peace of mind that Sony is looking after your equipment, and your business.
