

HZC-RCP5

Remote control software for HXC-D70, HXC-100 and HSC-300 cameras

Overview

PC software lowers the cost of remote control for multiple camera systems

The HZC-RCP5 application software provides remote control from a Windows PC* of up to 5 HXC-D70 studio cameras working with the HXCU-D70 Camera Control Unit (CCU). The software also provides remote control for HXC-100 and HSC-300 cameras working with the HXCU-100 CCU**. It provides very low cost control using a LAN connection via a Hub.

* OS Windows 7, English version.

** HXCU-100 software v.1.20 or above required.

Display and control multiple camera functions

The very complete and easy to use GUI allows the user to control camera parameters as if he were using a RCP panel such as the RCP-1000, while offering more functionality. Unlike the RCP-1000, all the Paint parameters can be displayed and controlled, apart from Scene Files management.

Features

- **Remote control for up to 5 HXC-D70 cameras**

The HZC-RCP5 application software provides remote control from a Windows PC* of up to 5 HXC-D70 studio cameras working with the HXCU-D70 Camera Control Unit (CCU).

* OS Windows 7, English version.

- **Alternative remote control for up to 5 HXC-100 and HSC-300 cameras**

The software also provides remote control for HXC-100 and HSC-300 cameras working with the HXCU-100 CCU**.

** HXCU-100 software v.1.20 or above required.

- **Adjustments of multiple cameras simultaneously presented on any size screen**

The software gives powerful control of the camera system, with faster matching and control of all the cameras in the system. The GUI can be displayed on any size screen, including large projections for educational applications.

- **LAN connection via a Hub**

The software provides very low cost control using a LAN connection via a Hub for a variety of applications.

- **Powerful control of multiple camera parameters**

Unlike the RCP-1000, all the Paint parameters can be displayed and controlled, apart from Scene Files management.

- **Panel Screen and Paint Menu Screen modes**

The software can present two different camera parameter modes:

Panel Screen (Panel Mode)

In this mode, the basic functions of a camera can be controlled by the GUI on the screen, similar to the control level found with an RCP-1000 series remote control panel.

Paint Menu Screen (Menu Mode)

In this mode, more detail camera parameters (ie. Matrix, Knee, etc.) of the HXC-D70 camera can be displayed and controlled by the GUI.

Compatible Products

4K and HD System Cameras

HDC-P1

Three 2/3-inch Power HAD
FX CCD sensors full HD
compact system camera
with HD-SDI output
