PMW-100

Solid-State Memory Camcorder

XDCAM **MPEG HD422** **DVCAM** **SXS Exmor**

High-quality XDCAM® HD422 Handheld Camcorder

The PMW-100 is a compact and lightweight camcorder with a new (as of 4/12) 1/2.9-inch type Exmor™ CMOS sensor. With its high-quality MPEG HD422 (50 Mbps) recording capability, which is widely accepted in broadcasting stations and production houses, the PMW-100 can contribute to your creativity in many different applications, including news gathering and documentary production.

Compact Design

» Handheld Camcorder for Professional Use

The PMW-100 is a compact and lightweight camcorder with abundant features for the professional user. Its ergonomic design gives more shooting opportunities from a variety of angles. And it can be used as an ideal companion camera with the PMW-500 XDCAM HD422 memory camcorder.

(PMW-100 shown with optional mic)

Camera Features

» High Sensitivity

The PMW-100 incorporates a 1/2.9-type Full HD Exmor CMOS sensor (1920 x 1080) to achieve high resolution, high sensitivity, low noise, and wide dynamic range. These capabilities are essential to the professional when shooting under extreme lighting conditions*.

* For example: low light conditions or very bright light conditions, such as a very sunny day.

» Manual Control of Lens

The PMW-100 incorporates 5.4 - 54 mm (equivalent to 40 - 400 mm on 35 mm lens) zoom lenses with an Optical SteadyShot® feature, and – to expand its applications – an optional VCL-HG0737K lens (a 0.7x wide conversion lens). Zoom and focus can be manually controlled with the Lens Control Ring, which includes a selector switch to set the ring for focus or zoom control. There is also an Exposure Control Dial for manual adjustment of camera brightness.

» 3.5-inch WVGA (852x480) LCD Monitor

The PMW-100 is equipped with a large, easy-to-read, 3.5-inch* WVGA color LCD panel, which assists with critical focus control during HD shooting.

* (Viewable area measured diagonally)

Simulated image

» Focus Assist Functions

Various functions are provided to help with precise control of focus. These include Color Peaking, MF (Manual Focus) Assist, One-push Auto Focus, Expanded Focus, and the Auto Focus function.

» Slow & Quick Motion (Visual Effects)

By changing the frame rate, slow- and fast-motion visual effects (Slow & Quick Motion) are available. Other visual effects include Interval Recording, Frame Recording, and Slow Shutter.

» NightShot Function

The PMW-100 offers a NightShot® function, which adopts a built-in Infrared LED. This function helps users to shoot in extremely low light environments without any light sources.

» Picture Profile

The Picture Profile feature allows you to easily call up customized picture-tonal settings to suit particular shooting conditions, rather than having to readjust the camera each time. Picture Profile data can be saved on SxS® memory cards, and shared with multiple PMW-100 units.

» Selectable Gamma Curves

You can select the best-suited preset gamma curve to handle contrast and give a specific 'look' to an image. There are six types of standard gamma curve, and four types of HyperGamma which are identical to those on CineAlta™ cameras.

Recording Section

» MXF and FAT File Format

The PMW-100 can be used as a handheld camcorder for various types of file-based operation because it employs both industry-standard file formats: the MXF file format (UDF) and MP4 file format (FAT).

» MPEG HD422 Codec

You can record Full HD video (1920x1080) at up to 50 Mbps using MPEG HD422 compression technology, and enjoy the benefits of proven, high-speed, and intuitive XDCAM HD422 workflow. With the PMW-100, you can also record video in MPEG HD or DVCAM™ format. (Note: Proxy video is not available with the PMW-100.)

XDCAM

¹ Recording time may vary depending on models being used and settings.

² Approximately 59.4GB

³ Actual performance varies based on settings, environmental conditions, and usage. Battery capacity decreases over time and use.

⁴ Based on Sony internal testing, may vary depending on conditions and usage.

» 4-hour Continuous Recording¹

By combining the BP-U60 with two optional SBS-64G1A SxS Memory Cards (64-GB SxS-1™ cards)², you can record continuously for up to four hours. With the high-capacity Lithium-Ion battery BP-U90, you can achieve up to six hours³ of continuous operation.

» Cache Recording

Once activated, the PMW-100 continuously streams audio and video into its internal memory. When you push the REC START button, the content buffered in the camcorder's memory is recorded onto the memory media at the start of the recording clip. The caching period can be set at up to 15 seconds. This function is useful when shooting a developing situation, such as in news gathering, so as not to miss a critical moment.

» Continuous Recording

By activating the Continuous Recording function, multiple clips can be recorded as a single clip, which makes it easy to ingest the file to a Non Linear Editing (NLE) system.

» Reliable, High-speed Recording Media

The XDCAM Series uses high-speed SxS PRO™ and SxS-1 memory cards for its recording media, developed specifically for professional content creation applications. These memory cards boast high-speed data transfer, which accelerates the post-production workflow. SxS memory cards are also resistant to shock and vibration⁴. Furthermore, Memory Stick® media, SD cards, and XQD cards can be used as emergency backup media with the appropriate adaptors.

SxS

Audio

» High-quality Audio

The PMW-100 is equipped with two XLR connectors, which are for professional microphones such as the ECM-MS2/680S/678/673 and wireless microphone systems such as the UWP-V1/V2. By combining the built-in stereo microphone with external microphone input, you can record up to four channels of 24-bit 48-kHz high-quality audio in MPEG HD422 50-Mbps mode.

Interfaces

» HD/SD-SDI, HDMI, and i.LINK

The SDI connector allows the camcorder to interface with other professional products, and supports down-conversion from HD to SD signals. A domestic-use TV can be used as a monitor with the HDMI connector. The i.LINK^{®1} connector can be used for HDV when SP 1440 (FAT) mode is selected, and for DV when DVCAM (FAT) mode is selected.

» Timecode IN/OUT, and Genlock

The PMW-100 comes equipped with Timecode Input/Output and Genlock Input connectors. These allow you to synchronize the timecode and video with other cameras, enabling easier multi-camera productions.

» USB2.0 (Device)

The PMW-100 can be connected directly with a PC using the USB interface. Even without a memory card reader/writer, you can easily ingest shot files from the PMW-100 to your PC.

¹ i.LINK is a Sony trademark used only to designate that a product is equipped with an IEEE 1394 connector. Not all products with an i.LINK connector may communicate with each other. Please refer to the documentation that comes with any device having an i.LINK connector for information on compatibility, operating conditions and proper connection

SPECIFICATIONS

General	
Weight	Approx 3 lb 5 oz (Approx 1.5 kg) (body) Approx. 3 lb 15 oz (Approx. 1.8 kg) (with lens hood, eye piece, BP-U30 battery, a SxS memory card)
Dimensions (W x H x D)	6.5/8 x 6 1/2 x 11 inches (167 x 164 x 278 mm) (without protrusions)
Power Requirements	DC 12 V
Power Consumption	Approx. 12 W (while recording, EVF On, LCD monitor Off, I/O Select Off) Approx. 14 W (while recording, EVF On, LCD monitor On, I/O Select HD SDI & HD HDMI)
Operating Temperature	32°F to 104°F (0°C to 40°C)
Storage Temperature	-4°F to +140°F (-20°C to +60°C)
Battery Operating Time ¹	Up to 2 hrs with BP-U30 battery (while recording, HQ 1920 59.94i Mode, EVF On, LCD monitor Off, I/O Select Off) Up to 4 hrs with BP-U60 battery (while recording, HQ 1920 59.94i Mode, EVF On, LCD monitor Off, I/O Select Off) Up to 6 hrs with BP-U90 (while recording, HQ 1920 59.94i Mode, EVF On, LCD monitor Off, I/O Select Off)
Recording Format (Video)	<UDF> - HD422 Mode: CBR, maximum bit rate: 50 Mbps, MPEG-2 422P@HL - HD420 Mode: VBR, 35 Mbps, MPEG-2 MP@HL - DVCAM Mode: DVCAM <FAT> - HQ 1920 Mode: VBR, 35 Mbps, MPEG-2 MP@HL - HQ 1440 Mode: VBR, 35 Mbps, MPEG-2 MP@HL - SP 1440 Mode: CBR, 25 Mbps, MPEG-2 MP@H-14 - DVCAM Mode: DVCAM
Recording Format (Audio)	<UDF> - HD422 Mode: LPCM 24 bits, 48 kHz, 4 channels - Other Mode: LPCM 16 bits, 48 kHz, 4 channels <FAT> - HD Mode: LPCM 16 bits, 48 kHz, 4 channels - SD Mode: LPCM 16 bits, 48 kHz, 2 channels
Recording Frame Rate	<UDF> HD422 Mode: MPEG-2 422P@HL, 50Mbps/ CBR - 1920x1080/ 59.94i, 50i, 29.97p, 25p, 23.98p - 1280x720/ 59.94p, 50p, 29.97p, 25p, 23.98p HD420 Mode: MPEG-2 MP@HL, 35Mbps/ VBR - 1440x1080/ 59.94i, 50i, 29.97p, 25p, 23.98p - 1280x720/ 59.94p, 50p, 23.98p DVCAM Mode: - 720x480/ 59.94i, 29.97pSF - 720x576/ 50i, 25pSF <FAT> HQ 1920 Mode: MPEG-2 MP@HL, 35Mbps/ VBR - 1920x1080/ 59.94i, 50i, 29.97p, 25p, 23.98p HQ 1440 Mode: MPEG-2 MP@HL, 35Mbps/ VBR - 1440x1080/ 59.94i, 50i, 29.97p, 25p, 23.98p HQ 1280 Mode: MPEG-2 MP@HL, 35Mbps/ VBR - 1280x720/ 59.94p, 50p, 29.97p, 25p, 23.98p SP 1440 Mode: MPEG-2 MP@H-14, 25Mbps/ CBR - 1440x1080/ 59.94i, 50i, 23.98p (2-3 pull down) DVCAM Mode: - 720x480/ 59.94i, 29.97pSF - 720x576/ 50i, 25pSF
Recording/Playback Time ²	<UDF> HD 422 Mode: 120 min with SBP-64A/ SBS-64G1A (64GB) memory card 60 min with SBP-32/ SBS-32G1A (32GB) memory card 30 min with SBP-16 (16GB) memory card HD 420 Mode: 180 min with SBP-64A/ SBS-64G1A (64GB) memory card 90 min with SBP-32/ SBS-32G1A (32GB) memory card 45 min with SBP-16 (16GB) memory card DVCAM Mode: 220 min with SBP-64A/ SBS-64G1A (64GB) memory card 110 min with SBP-32/ SBS-32G1A (32GB) memory card 55 min with SBP-16 (16GB) memory card <FAT> HQ 1920/HQ 1440 Mode: 200 min with SBP-64A/ SBS-64G1A (64GB) memory card 100 min with SBP-32/ SBS-32G1A (32GB) memory card 50 min with SBP-16 (16GB) memory card SP 1440 Mode: 280 min with SBP-64A/ SBS-64G1A (64GB) memory card 140 min with SBP-32/ SBS-32G1A (32GB) memory card 70 min with SBP-16 (16GB) memory card

¹ Varies based on setting conditions and usage. Capacity decreases over time and use.

² Recording time may vary depending on models being used and shooting settings. 1 GB = one billion bytes. Actual formatted capacity will be less.

DVCAM Mode Approx. 260 min with SBP-64/ SBS-64G1A (64 GB) memory card Approx. 130 min with SBP-32/ SBS-32G1A (32 GB) memory card Approx. 65 min with SBP-16 (16 GB) memory card	
Lens	
Lens Mount	Fixed
Zoom Ratio	10x (optical), servo/manual
Focal Length	f = 5.4 - 54 mm (equivalent to 40-400 mm on 35 mm lens)
Iris	F1.8 - F2.9, auto/manual selectable
Focus	AF/MF selectable, 10 mm to ∞ (Wide), 800 mm to ∞ (Tele)
Image Stabilizer	ON/OFF selectable, shift lens
Filter Diameter	M37 mm, pitch 0.75mm
Camera Section	
Imaging Device (Type)	1/2.9-inch type Single-chip Exmor CMOS
Effective Picture Elements	1920 (H) x 1080 (V)
Minimum Illumination	0.40 lx (typical) (1920 x 1080/59.94i Mode, F1.8, +18 dB gain, with 64-frame accumulation, 100% video level) 0.08 lx (typical) (1920 x 1080/59.94i Mode, F1.8, +18 dB gain, with 64-frame accumulation, 50% video level)
Shutter Speed	1/32 sec to 1/2,000 sec
Slow Shutter (SLS)	2, 3, 4, 5, 6, 7, 8, 16, 32, and 64-frame accumulation
Slow & Quick Motion Function	720p: Frame rate selectable from 1 fps to 60 fps (from 1 fps to 50 fps in PAL area setting in UDF Mode)
	1080p: Frame rate selectable from 1 fps to 30 fps (from 1 fps to 25 fps in PAL area setting in UDF Mode)
White Balance	Preset (3200K), Memory A, Memory B/ATW
Gain	-3, 0, 3, 6, 9, 12, 18 dB, AGC
