

QD-G128A

128 GB XQD G Series memory card for professional shooting

Overview

- **High-speed memory card**

XQD G Series Memory Card is the best performing XQD card for 4K users. Its outstanding reading speed of 400MB/s and writing speed of 350MB/s* enhances the capabilities of high-speed burst shooting with DSLR cameras. A Sony unique Speed-Degradation Avoiding Function enables stable recording with 4K video cameras.

* Based on Sony internal testing. Transfer speed may vary and depend on host device

- **Tough and durable media**

XQD G Series Memory Card has been designed for professional use, with rigorous testing procedures to resist extreme environments. This memory card is tough enough to withstand the harshest filming conditions. Its intelligent controller also gives you peace of mind with reliable data recording.

Features

- **Fast recording media for professional use**

Sony XQD G Series has a reading speed of 400MB/s and a writing speed of 350MB/s*.

* Based on Sony internal testing. Transfer speed may vary and depend on host device
