SR-1TS25

SRMemory Card, 1 TB capacity and 2.5 Gbps guaranteed write speed

The SR-1TS25 SRMemory Card is an ultra high-speed, high-capacity, and high-reliability flash memory media for SRMASTER series products, ideal for demanding professional applications including 3D production, high-frame-rate digital cinematography, and high-resolution digital cinematography.

The SR-1TS25 SRMemory Card has a capacity of 1 TB and guaranteed write speed of 2.5 Gbps.

SRMemory is unique with its combination of capacity, sustained data throughput, security and portability. It opens up completely new ways for end-users to work. SRMemory Cards work with an exciting line-up of recording devices and cameras, including the F65 Camera and SR-R4

combination up to 25 frames per second, SR-R1000 Memory Storage Unit, SRPC-5 and SR-PC4 Data Transfer Units, as well as the SR-R1 Portable Memory Recorder. The cards can record and replay two streams simultaneously.
