FPS-150

**15" Full-Color LCD
Prompting System**

*A Revolution in
Intelligent Design*

Telescript's FPS-150

The best of both worlds.

The ultimate combination of light weight and maximum viewability, the Telescript FPS-150 Prompting System delivers high brightness and large viewing area, but at a fraction of the weight of other systems.

Slim Design

Utilizing the latest in ultra-light materials, the **FPS-150** weighs in at a mere 18 lbs. in standard configuration. A collapsible cloth hood (pictured at right) subtracts even more weight, making it perfect for today's robotic camera heads.

Readable

An ultra-bright, full-color 15-inch TFT LCD panel drives system, delivering unmatched brightness and readability. Plus, Telescript's patented **anti-reflective glass** screen covers - standard on all models - promises a clear picture even in the most difficult lighting conditions.

Configurable

The **FPS-150** offers many available options, such as the **QuickMount** mounting system, which allows the entire system to be rapidly set-up or disassembled; oversized **trapezoidal hoods** (right) for oversized studio lenses; and an ultra-lightweight cloth **folding hood**.
