UNIVERSAL FOLLOW FOCUS

UFF-1 Universal Follow Focus is the first follow focus to be compatible with 15mm LVV, 15mm Studio, and 19mm rods without the use of adapters. Simply unlock the rod clamps and slide to the appropriate position. Notches in the bottom of the bridge indicate when the clamp is in the perfect position. The included swing arm can be reversed to the front or back position which is helpful for compact lens configurations and the bridge has the lowest height in the industry so it will work with the larger zoom lens barrels. Each hand wheel includes a standard marking disc and a hard stop disc which provides positionable limits when using DSLR lenses with infinite barrel rotation. The hand wheels are removable and have standard accessory ports for whip and crank. Included in the kit are 5 gear attachments: .5 mod for Canon ENG, .6 mod for Fujinon ENG, .8 mod small diameter / .8 mod large diameter for cinema lenses, and a friction gear for DSLR lenses. Each kit ships in custom cut foam which fits natively into a Pelican 1500 case (not included).

UNIFIED DSLR CAGE

Unified DSLR Cage takes the best features from our original DSLR system and adds compatibility for the new Sony and Panasonic XLR interfaces on top of the camera. The open shoe mount area allows for the XLR adapter to be installed without obstruction. Cage includes a folding and reversible top handle which can be repositioned over the lens area, an HDMI lock, integrated lens adapter support, Manfrotto video dovetail quick release, dovetail receiver plate, and an anti-twist design holds the camera firmly in place.

The optional 1.5mm baseplate provides height adjustable 1.5mm rods and on the bottom is an ARRI standard dovetail interface with included quick release dovetail for attaching to a tripod plate when an ARRI dovetail is not in use.
