Battery Slide (CION, V-Mount) utilizes an IDX V-Mount plate, AJA CION Molex connector, and a custom Battery Slide which attaches directly to the back of the camera. This system attaches to the internal Molex connector on CION rear, so you have the ability to also plug in an AC adapter or block battery to the XLR power input on camera and hot swap between the two without powering down. Loosen thumbscrew to slide and adjust battery plate position. Perfectly fits rear profile of CION for compact packing in camera case.

2x D-Tap ports for accessory power.

SPECIFICATIONS:

Weight: 362.8 g (0.8 lbs)

Dimensions: 50.8 x 127 x 152.4 mm (2 x 5 x 6 in)
