E-Mount to PL Adapter Pro (1/4-20 Support Foot) is a shimmable version of our popular Sony E-Mount lens mount adapter that enables mounting of PL mount lenses onto the Sony E-Mount cameras. Mount includes a foot with 1/4-20 threaded hole for attaching to a tripod eliminating strain on the camera. The support foot can also be attached to the **Unified Baseplate (FS7)** (</Product-p/222100.html>) or **(FS5)** (</Product-p/222400.html>) using the vertical support hole and the **Unified Lens Adapter Support Kit** (</Product-p/227900.html>). PL Cap included to prevent dust from entering sensor area when lens is not attached.

In our factory, we set the flange focus using collimation tools. You only need to adjust the shims should you find that your camera is out of calibration. The adapter is shimmable by loosening six socket cap screws around the collar area, separating the two sections, and adding color coded shims of various thickness. Back focus should be checked using collimation tools or a wide lens focused to infinity.

Includes:

(2) M4x20mm socket cap screw

SPECIFICATIONS:

Weight: 251g (0.6 lbs)

Dimensions: 85.1 x 81.8 x 48 mm (3.4 x 3.2 x 1.9 in)
