MFT to PL Adapter Pro (1/4-20 Support Foot) is a shimmable version of our popular micro four thirds lens mount adapter that enables mounting of PL mount lenses onto the MFT cameras. Mount includes a foot with 1/4-20 threaded hole for attaching to a tripod eliminating strain on the camera. The foot can also attach directly to the front of the **Pocket Cage (/Product-p/168800.html)** or the **Micro Cage (/Product-p/209700.html)** by two included screws. PL Cap included to prevent dust from entering sensor area when lens is not attached.

In our factory, we set the flange focus using collimation tools. You only need to adjust the shims should you find that your camera is out of calibration. The adapter is shimmable by loosening six socket cap screws around the collar area, separating the two sections, and adding color coded shims of various thickness. Back focus should be checked using collimation tools or a wide lens focused to infinity.

Includes:

(2) M4x20mm socket cap screw

SPECIFICATIONS:

Weight: 251g (0.6 lbs)

Dimensions: 85.1 x 81.8 x 48 mm (3.4 x 3.2 x 1.9 in)
